Teacher and class:

A note from Peter

I come from Slovakia, and I live in Australia now. I'm a dad to Sakura, and I made Mr. Pepo, the light-bulb inventor, with his robot Luna and his dog Sakura.

My mind works differently. I call that a **mental ability, not a disability**. At school, I learned that a good teacher could change a whole day, and a classroom that didn't fit could make me feel like I was the problem.

This journal is for the teachers who notice. Use it to track what works for different learners, celebrate students' strengths, and plan small changes that help the whole class. Thank you for what you do. **There are no wrong answers.**

My classroom

How my classroom makes room for different minds:

Quiet or calm spaces we have (or could have):

Sensory things to watch (noise, lights, smells, crowding):

How I give instructions (spoken, written, visual):

One change I'd like to make this term:

A Mr. Pepo class activity. Ask your class, and write their answers.

What is your brain really good at?

What would you invent to help someone?

What makes our classroom a good place to think?

What could make it even better?

How can we help a classmate who thinks differently from us?
